
CCR-4 Antibody

Subcategory: Rabbit Polyclonal Antibody

Cat. No.: 251537

Unit: 0.1 mg

Description:

CC chemokine receptor 4 (CCR4) is a G protein-linked seven transmembrane domain chemokine receptor that binds the chemokines CCL17/TARC and CCL22/MDC. Current evidence suggests that CCR4 expression is associated with Th2 type T cells and with platelets. CCR4 expression has also been reported in mature dendritic cells.

Isotype: Rabbit Ig

Applications: E, WB, IHC, IP

Species Reactivity: H, M, R

Format: Each vial contains 0.1 mg IgG in 0.1 ml (1 mg/ml) of PBS pH7.4 with 0.09% sodium azide. Antibody was purified by Protein-G affinity chromatography.

Alternate Names: CCR-4; C-C chemokine receptor type 4; C-C CKR-4; CC-CKR-4; CCR4; K5-5; CD194; CMKBR4

Accession No.: P51679

Antigen: KLH-conjugated synthetic peptide encompassing a sequence within the N-term region of human CCR-4.

Application Notes: E: 1:500-1:1,000; WB: 1:100-1:500; IHC: 1:100-1:500; IP: 1:100-1:500

Storage: Store at -20°C. Minimize freeze-thaw cycles.

Product is guaranteed one year from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
