
Control Rabbit IgG

Subcategory: Rabbit Polyclonal Antibody, Control Antibody

Cat. No.: 254513

Unit: 10 mg

Description:

This antibody is an isotype control for rabbit IgG immunoglobulins. The antibody can be used as a negative control in western blot, immunofluorescence, flow cytometry or immunohistochemistry. The rabbit IgG is highly purified from the serum of non-immunized animals. No contamination is observed at a minimum protein concentration of 20 mg/ml when tested by immunoelectrophoresis against anti-whole serums, anti-immunoglobulins (class-specific), or anti-fragment-specific antisera.

Isotype: Rabbit Ig

Applications: WB, IF, FC, IHC

Species Reactivity:

Format: Each vial contains 10 mg IgG in 1 ml (10 mg/ml) of PBS pH7.6. Antibody was purified by antigen-affinity chromatography.

Alternate Names: Immunoglobulin G, type g heavy chain

Accession No.:

Antigen: This product is purified from non-immunized animals.

Storage: Store at 4°C under sterile conditions. Product is guaranteed 1 year from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
