
ENC-2 Antibody

Subcategory: Chicken Polyclonal Antibody

Cat. No.: 254261

Unit: 0.1 mg

Description:

The ectoderm-neural cortex-2 (ENC-2) protein is a member of the BTB/PDZ Kelch protein family displaying significant homology to ENC-1, an actin-binding protein involved in neural fate specification during embryogenesis and adipocyte maturation. The exact function of ENC-2 has yet to be determined, but it has been suggested to be involved in the differentiation of neuronal precursor cells into neurons and astrocytes.
