

eRF3a Antibody

Subcategory: Rabbit Polyclonal Antibody

Cat. No.: 252194

Unit: 0.1 mg

Description:

Eukaryotic peptide chain release factor GTP-binding subunit ERF3A (eRF3a, GSPT1) is involved in translation termination in response to the termination codons UAA, UAG and UGA. eRF3a stimulates the activity of ERF1. eRF3a is involved in the regulation of mammalian cell growth.

Isotype: Rabbit Ig

Applications: E, IHC, WB

Species Reactivity: H, M, R

Format: Each vial contains 0.1 mg IgG in 0.1 ml (1 mg/ml) of PBS pH7.4, 2% BSA with with 0.09% sodium azide. Antibody was purified by immunogen affinity chromatography.

Alternate Names: Eukaryotic peptide chain release factor GTP-binding subunit ERF3A; Eukaryotic peptide chain release factor subunit 3a; eRF3a; G1 to S phase transition protein 1 homolog; GSPT1; ERF3A

Accession No.: P15170

Antigen: KLH-conjugated synthetic peptide encompassing a sequence within the N-term region of human eRF3a.

Application Notes: E: 1:5,000-1:20,000; WB: 1:500-1:1,000

The eRF3a Antibody is used in Western blot to detect eRF3a in HeLa cell lysates.

Storage: Store at -20°C. Minimize freeze-thaw cycles. Product is guaranteed one year from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
