
Fibulin-1 Antibody

Subcategory: Rabbit Polyclonal Antibody

Cat. No.: 251306

Unit: 0.1 mg

Description:

Fibulin-1 is incorporated into fibronectin-containing matrix fibers. Fibulin-1 plays a role in cell adhesion and migration along protein fibers within the extracellular matrix (ECM), and is involved in the supramolecular organization of ECM architecture. A chromosomal aberration in the fibulin-1 gene is found in a complex type of synpolydactyly referred to as 3/3-prime/4 synpolydactyly associated with metacarpal and metatarsal synostoses.

Isotype: Rabbit Ig

Applications: E, IHC, WB

Species Reactivity: B, Ck, D, Hs, H, M, P, R

Format: Each vial contains 0.1 mg IgG in 0.1 ml (1 mg/ml) of PBS pH7.4 with 0.09% sodium azide. Antibody was purified by Protein-G affinity chromatography.

Alternate Names: Fibulin-1; Fibulin 1; FIBL-1; FBLN1

Accession No.: P23142

Antigen: KLH-conjugated synthetic peptide encompassing a sequence within the C-term region of human fibulin-1.

Application Notes: E: 1:500-1:1,000; WB: 1:100-1:500; IHC: 1:100-1:500

Storage: Store at -20°C. Minimize freeze-thaw cycles.

Product is guaranteed one year from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
