
FOSL1 Antibody

Subcategory: Rabbit Polyclonal Antibody

Cat. No.: 251523

Unit: 0.1 mg

Description:

Fos-related antigen 1 (FOSL1) is a protein that in humans is encoded by the FOSL1 gene. The Fos gene family consists of 4 members: FOS, FOSB, FOSL1, and FOSL2. These genes encode leucine zipper proteins that can dimerize with proteins of the JUN family, thereby forming the transcription factor complex AP-1. As such, the FOS proteins have been implicated as regulators of cell proliferation, differentiation, and transformation.
