
HA synthase 1 Antibody

Subcategory: Rabbit Polyclonal Antibody

Cat. No.: 251696

Unit: 0.1 mg

Description:

Hyaluronan synthase 1 (HA synthase 1) plays a role in hyaluronan/hyaluronic acid (HA) synthesis. HA synthase 1 catalyzes the synthesis of chito-oligosaccharide depending on the substrate. HA synthase 1 is highly expressed in ovary followed by spleen, thymus, prostate, testes and large intestine, and is weakly expressed in small intestine.

Isotype: Rabbit Ig

Applications: E, WB

Species Reactivity: H

Format: Each vial contains 0.1 mg IgG in 0.1 ml (1 mg/ml) of PBS pH7.4 with 0.09% sodium azide. Antibody was purified by Protein-G affinity chromatography.

Alternate Names: Hyaluronan synthase 1; Hyaluronate synthase 1; Hyaluronic acid synthase 1; HA synthase 1; HuHAS1; HAS1; HAS

Accession No.: Q92839

Antigen: KLH-conjugated synthetic peptide encompassing a sequence within human HAS synthase 1.

Application Notes: E: 1:500-1:1,000; WB: 1:100-1:500

Storage: Store at -20°C. Minimize freeze-thaw cycles.

Product is guaranteed one year from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
