

HLX1 Antibody

Subcategory: Rabbit Polyclonal Antibody

Cat. No.: 252126

Unit: 0.1 mg

Description:

H2.0-like homeobox protein (HLX1) is a transcription factor required for TBX21/T-bet-dependent maturation of Th1 cells as well as maintenance of Th1-specific gene expression. HLX1 is involved in embryogenesis and hematopoiesis. HLX1 has a low level of expression in normal B and T-cells, and high levels in activated lymphocytes and monocytes. HLX1 is also found in thymus, tonsil, bone marrow, developing vessels, and fetal brain.

Isotype: Rabbit Ig

Applications: E, WB

Species Reactivity: H

Format: Each vial contains 0.1 mL of crude serum with 0.09% sodium azide.

Alternate Names: H2.0-like homeobox protein; Homeobox protein HLX1; Homeobox protein HB24; HLX; HLX1

Accession No.: Q14774

Antigen: KLH-conjugated synthetic peptide encompassing a sequence within the center region of human HLX1.

Application Notes: E: 1:10,000-1:50,000; WB: 1:200-1:1,000

The HLX1 Antibody is used in Western blot to detect HLX1 in HepG2 cell lysates.

Storage: Store at -20°C. Minimize freeze-thaw cycles. Product is guaranteed one year from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
