
Inhibin alpha (4A2) Antibody

Subcategory: Mouse Monoclonal Antibody

Cat. No.: 252683

Unit: 0.1 mg

Description:

INHA (Inhibin alpha) is a 366 amino acid long (~40kD) protein, regulates endocrin secretion. It is involved in regulating a number of diverse functions such as hypothalamic and pituitary hormone secretion, gonadal hormone secretion, germ cell development and maturation, erythroid differentiation, insulin secretion, nerve cell survival, embryonic axial development and bone growth.

Isotype: Mouse IgG1

Applications: IF, IHC

Species Reactivity: H

Format: Each vial contains 0.1 mg IgG in PBS pH7.4 with 0.03% sodium azide. Antibody was purified by Protein-G affinity chromatography.

Alternate Names: Inhibin alpha chain; INHA

Accession No.: P05111

Antigen: Purified recombinant fragment of human INHA expressed in E. coli.

Application Notes: IHC: 1:200-1:1000; IF: 1:200-1:1000

Storage: Store at 4°C for short term use only. Store at -20°C for storage over 1 month. Product is guaranteed 6 months from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
