
MAP4K4 (4H9E) Antibody

Subcategory: Mouse Monoclonal Antibody

Cat. No.: 252791

Unit: 0.1 ml

Description:

MAP4K4 (Mitogen-activated protein kinase kinase kinase 4) is a member of the serine/threonine protein kinase family. This kinase has been shown to specifically activate MAPK8/JNK. The activation of MAPK8 by this kinase is found to be inhibited by the dominant-negative mutants of MAP3K7/TAK1, MAP2K4/MKK4, and MAP2K7/MKK7, which suggests that this kinase may function through the MAP3K7-MAP2K4-MAP2K7 kinase cascade, and mediate the TNF- α signaling pathway.
