
Meprobamate Antibody

Subcategory: Sheep Polyclonal Antibody

Cat. No.: 252395

Unit: 0.1 ml

Description:

Launched in 1955, meprobamate was the first blockbuster psychotropic drug in America. Its popularity spread from patients to Hollywood, but the clinical use declined due the drug being deemed a sedative and not a tranquilizer, and also due to its addictive potential at doses not much higher than the recommended dose. The advent of highly effective benzodiazepines and other drugs have all but rendered meprobamate obsolete.

Isotype: Sheep Ig

Applications: E, WB

Species Reactivity: H, M, R

Format: Each vial contains 0.1 ml IgG (7-12 mg/ml) in 20mM phosphate, 150mM NaCl buffer, pH7.2 with 0.09% sodium azide. Antibody was purified by caprylic acid and ammonium sulfate precipitation.

Alternate Names: Meprobamate; Miltown; Equanil; Meprospan

Accession No.: 57-53-4

Antigen: Meprobamate-BTG

Application Notes: E: 1:10,000-1:50,000; WB: 1:200-1:1,000

Storage: Store at -20°C. Minimize freeze-thaw cycles.

Product is guaranteed one year from the date of shipment.
