

Pan Cytokeratin (7H8) Antibody

Subcategory: Mouse Monoclonal Antibody

Cat. No.: 252876

Unit: 0.1 ml

Description:

Cytokeratins are proteins of keratin-containing intermediate filaments found in the intracytoplasmic cytoskeleton of epithelial tissue. There are two types of cytokeratins: the acidic type I cytokeratins and the basic or neutral type II cytokeratins. Cytokeratins are usually found in pairs comprising a type I cytokeratin and a type II cytokeratin. Immunohistochemical detection of cytokeratins is of immense value in tumor cell diagnosis and identification.
