

Parafibromin Antibody

Subcategory: Rabbit Polyclonal Antibody

Cat. No.: 200155

Unit: 0.1 mg

Description:

Parafibromin (CDC73) is a tumor suppressor involved in transcriptional and post-transcriptional control pathways, such as cell cycle progression through the regulation of cyclin D1/PRAD1 expression. Defects in CDC73 are the cause of parathyroid gland tumors.

Isotype: Rabbit Ig

Applications: E, WB

Species Reactivity: H, M, R, X

Format: Each vial contains 0.1 mg IgG in 0.1 ml (1 mg/ml) of PBS pH7.4 with 0.09% sodium azide. Antibody was purified by saturated sodium sulfate precipitation.

Alternate Names: Parafibromin; Cell division cycle protein 73 homolog; Hyperparathyroidism 2 protein; CDC73; C1orf28; HRPT2

Accession No.: Q6P1J9

Antigen: KLH-conjugated synthetic peptide encompassing a sequence within the C-term region of human parafibromin.

Application Notes: E: 1:500-1:1,000; WB: 1:100-1:500

The Parafibromin Antibody (Cat. No. 200155) is used in Western blot to detect Parafibromin in HL-60 cell lysate.

Storage: Store at -20°C. Minimize freeze-thaw cycles. Product is guaranteed one year from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
