PML Antibody

Subcategory: Rabbit Polyclonal Antibody
Cat. No.: 200184
Unit: 0.1 mg

Description:
Promyelocytic leukemia protein (PML) is a transcription factor involved in transcriptional regulation and nuclear protein sequestration, such as recruiting ELF4 into PML nuclear bodies. A chromosomal aberration involving PML is a cause of acute promyelocytic leukemia.

Isotype: Rabbit Ig
Applications: E, WB
Species Reactivity: H, Mk
Format: Each vial contains 0.1 mg IgG in 0.1 ml (1 mg/ml) of PBS pH7.4 with 0.09% sodium azide. Antibody was purified by Protein-G affinity chromatography.
Alternate Names: Probable transcription factor PML; Tripartite motif-containing protein 19; RING finger protein 71; PML; MYL; RNF71; TRIM19; Promyelocytic leukemia protein
Accession No.: P29590

Antigen: KLH-conjugated synthetic peptide encompassing a sequence within the N-term region of human PML.
Application Notes: E: 1:500-1:1,000; WB: 1:100-1:500

Storage: Store at -20°C. Minimize freeze-thaw cycles. Product is guaranteed one year from the date of shipment.
