
PRMT6 (4G2) Antibody

Subcategory: Mouse Monoclonal Antibody

Cat. No.: 252953

Unit: 0.1 ml

Description:

PRMT6 (Protein arginine N-methyltransferase 6) enzyme is involved in post-translational modification. Protein arginine N-methyltransferases, such as PRMT6, catalyze the sequential transfer of a methyl group from S-adenosyl-L-methionine to the side chain nitrogens of arginine residues within proteins to form methylated arginine derivatives and S-adenosyl-L-homocysteine.

Isotype: Mouse IgG1

Applications: WB

Species Reactivity: H, Mk

Format: Each vial contains 0.1 ml ascitic fluid with 0.03% sodium azide.

Alternate Names: Protein arginine N-methyltransferase 6; Heterogeneous nuclear ribonucleoprotein methyltransferase-like protein 6; Histone-arginine N-methyltransferase PRMT6; HRMT1L6; PRMT6

Accession No.: Q96LA8

Antigen: Purified recombinant fragment of human PRMT6 expressed in *E. coli*.

Application Notes: WB: 1:200-1:1000;

Storage: Store at 4°C for short term use only. Store at -20°C for storage over 1 month. Product is guaranteed 6 months from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
