
REQUIEM Antibody

Subcategory: Rabbit Polyclonal Antibody

Cat. No.: 254403

Unit: 0.1 mg

Description:

Requiem is a member of the d4 domain family, characterized by a zinc finger-like structural motif. This protein functions as a transcription factor which is necessary for the apoptotic response following deprivation of survival factors. It is expressed in numerous tissues in both cytosolic and nuclear regions and likely serves a regulatory role in rapid hematopoietic cell growth and turnover. Requiem has been found to act as an adaptor protein that links the NF-kappaB and SWI/SNF chromatin remodeling factor and is considered a candidate gene for multiple endocrine neoplasia type I, an inherited cancer syndrome involving multiple parathyroid, enteropancreatic, and pituitary tumors.

Isotype: Rabbit Ig

Applications: E, WB

Species Reactivity: H, M

Format: Each vial contains 0.1 ml IgG in PBS pH 7.4 with 0.02% sodium azide. Antibody was purified by immunogen affinity chromatography.

Alternate Names: REQ; UBID4; ubi-d4; DPF2; double PHD fingers family 2

Accession No.: AAB81203

Antigen: KLH-conjugated synthetic peptide encompassing a sequence within human REQUIEM.

Application Notes: E: 1:500-1:1,000; WB: 1:100-1:500

Storage: Store at -20°C. Minimize freeze-thaw cycles.

Product is guaranteed one year from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
