
RTN3 (10A8) Antibody

Subcategory: Mouse Monoclonal Antibody

Cat. No.: 252897

Unit: 0.1 ml

Description:

RTN3 (Reticulon 3) is a multi-pass membrane protein. The reticulons are a group of highly conserved proteins with preferential expression in neuroendocrine tissues. RTN3 may be involved in membrane trafficking in the early secretory pathway. RTN3 inhibits BACE1 activity and amyloid precursor protein processing, also may induce caspase-8 cascade and apoptosis. May favor BCL2 translocation to the mitochondria upon endoplasmic reticulum stress. In case of enteroviruses infection, RTN3 may be involved in the viral replication or pathogenesis.

Isotype: Mouse IgG2a

Applications: IHC

Species Reactivity: H

Format: Each vial contains 0.1 ml ascitic fluid with 0.03% sodium azide.

Alternate Names: Reticulon-3; Neuroendocrine-specific protein-like 2; -like protein 2; Neuroendocrine-specific protein-like II; NSP-like protein II; NSPLII; ASYIP; NSPL2; RTN3

Accession No.: O95197

Antigen: Purified recombinant fragment of RTN3 expressed in *E. coli*.

Application Notes: IHC: 1:200-1:1000

Storage: Store at 4°C for short term use only. Store at -20°C for storage over 1 month. Product is guaranteed 6 months from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
