
SARS Spike Antibody

Subcategory: Rabbit Polyclonal Antibody

Cat. No.: 253534

Unit: 0.1 mg

Description:

A novel coronavirus has recently been identified as the causative agent of SARS (Severe Acute Respiratory Syndrome). Coronaviruses are a major cause of upper respiratory diseases in humans. The genomes of these viruses are positive-stranded RNA approximately 27-31kb in length. SARS infection can be mediated by the binding of the viral spike protein, a glycosylated 139 kDa protein and the major surface antigen of the virus, to the angiotensin-converting enzyme 2 (ACE2) on target cells. This binding can be blocked by a soluble form of ACE2.

Isotype: Rabbit Ig

Applications: E

Species Reactivity: Vs

Format: Each vial contains 0.1 ml IgG in PBS pH 7.4 with 0.02% sodium azide. Antibody was purified by immunogen affinity chromatography.

Alternate Names: SARS Spike ; SARS

Accession No.: P59594

Antigen: KLH-conjugated synthetic peptide encompassing a sequence within a synthetic peptide corresponding to amino acids at the carboxy-terminus of the SARS Spike glycoprotein.

Application Notes: E: 1:500-1:1,000

Storage: Store at -20°C. Minimize freeze-thaw cycles.

Product is guaranteed one year from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
