
SMARCB1 Antibody

Subcategory: Rabbit Polyclonal Antibody

Cat. No.: 251950

Unit: 0.1 mg

Description:

SWI/SNF-related matrix-associated actin-dependent regulator of chromatin subfamily B member 1 (SMARCB1) is an ATP-dependent chromatin-remodeling complex that plays important roles in cell proliferation and differentiation, in cellular antiviral activities and inhibition of tumor formation. Defects in SMARCB1 are a cause of schwannomatosis (SCHWA), also called congenital cutaneous neurilemmomatosis. Schwannomas are benign tumors of the peripheral nerve sheath that usually occur singly in otherwise normal individuals.

Isotype: Rabbit Ig

Applications: E, WB

Species Reactivity: H

Format: Each vial contains 0.1 mg IgG in 0.1 ml (1 mg/ml) of PBS pH7.4 with 0.09% sodium azide. Antibody was purified by Protein-G affinity chromatography.

Alternate Names: SWI/SNF-related matrix-associated actin-dependent regulator of chromatin subfamily B member 1; Integrase interactor 1 protein; SNF5 homolog; hSNF5; BRG1-associated factor 47; BAF-47; SMARCB1; BAF47; INI1; SNF5L1

Accession No.: Q12824

Antigen: KLH-conjugated synthetic peptide encompassing a sequence within the N-term region of human SMARCB1.

Application Notes: E: 1:500-1:1,000; WB: 1:100-1:500

Storage: Store at -20°C. Minimize freeze-thaw cycles.

Product is guaranteed one year from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
