
Stanozolol Antibody

Subcategory: Sheep Polyclonal Antibody

Cat. No.: 252456

Unit: 0.1 ml

Description:

Stanozolol is a synthetic anabolic steroid derived from testosterone, and has been approved by the FDA for human use. Unlike most injectable anabolic steroids, stanozolol is not esterified and is sold as an aqueous suspension, or in oral tablet form. Stanozolol has high bioavailability due to a C17 α -alkylation which allows the hormone to survive first-pass liver metabolism when ingested. It is because of this that stanozolol is also sold in tablet form. Stanozolol is popular among bodybuilders and professional athletes, some of whom have been fined for using banned performance enhancing drugs.

Isotype: Sheep Ig

Applications: E, WB

Species Reactivity: H, M, R

Format: Each vial contains 0.1 ml IgG (7-12 mg/ml) in 20mM phosphate, 150mM NaCl buffer, pH7.2 with 0.09% sodium azide. Antibody was purified by caprylic acid and ammonium sulfate precipitation.

Alternate Names: Stanozolol; Winstrol; Winstrol Depot

Accession No.: 10418-03-8

Antigen: Stanozolol-BSA

Application Notes: E: 1:10,000-1:50,000; WB: 1:200-1:1,000

Storage: Store at -20°C. Minimize freeze-thaw cycles.

Product is guaranteed one year from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
