
WDR92 Antibody

Subcategory: Rabbit Polyclonal Antibody

Cat. No.: 254335

Unit: 0.1 mg

Description:

WD40 repeats are a common structural module in eukaryotic proteins, and proteins containing WD40 domains have a wide range of functions, including signal transduction, cell cycle regulation, RNA splicing, and transcription. One such protein, WDR92, also known as monad, contains two WD40 repeats is widely expressed in human tissues, especially testis. Overexpression of this protein or its binding partner RNA polymerase II-associated protein 3 (RPAP3) potentiated apoptosis and caspase-3 activation induced by TNF-alpha and cycloheximide, suggesting that WDR92, together with RPAP3, may function as a novel modulator of apoptosis.

Isotype: Rabbit Ig

Applications: E, WB

Species Reactivity: H, M

Format: Each vial contains 0.1 ml IgG in PBS pH 7.4 with 0.02% sodium azide. Antibody was purified by immunogen affinity chromatography.

Alternate Names: WDR92; WD repeat-containing protein 92; monad

Accession No.: NP_612467

Antigen: KLH-conjugated synthetic peptide encompassing a sequence within human WDR92.

Application Notes: E: 1:500-1:1,000; WB: 1:100-1:500

Storage: Store at -20°C. Minimize freeze-thaw cycles.

Product is guaranteed one year from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
