## **ZBED2 Antibody**

**Subcategory:** Rabbit Polyclonal Antibody

**Cat. No.:** 254055

**Unit:** 0.1 mg

### **Description:**

The ZBED2 protein possesses a BED-type zinc finger, a 50 to 60 amino acid domain that contains a characteristic motif with two highly conserved aromatic positions, as well as a shared pattern of cysteines and histidines that is predicted to form the zinc finger. ZBED2 was identified through a screening of 37 human gastric cancer cDNA libraries. While the function of this protein unknown at this time, the presence of the zinc finger suggests that it may have DNA or RNA binding properties. This antibody is predicted to have no cross-reactivity to ZBED1 or ZBED3.

**Isotype:** Rabbit Ig

**Applications:** E, WB, ICC

**Species Reactivity:** H

**Format:** Each vial contains 0.1 ml IgG in PBS pH 7.4 with 0.02% sodium azide. Antibody was purified by immunogen affinity chromatography.

**Alternate Names:** ZBED2; Zinc finger BED-type domain containing 2

**Accession No.:** NP\_078784

**Antigen:** KLH-conjugated synthetic peptide encompassing a sequence within human ZBED2.

**Application Notes:** E: 1:500-1:1,000; WB: 1:100-1:500; ICC: 1:100-1:500

**Storage:** Store at -20°C. Minimize freeze-thaw cycles.

Product is guaranteed one year from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
