

Mouse CHODL / Chondrolectin Protein (Fc Tag)

Catalog Number: 50699-M02H

Sino Biological Inc.
Biological Solution Specialist

General Information

Gene Name Synonym:

C21orf68; MT75; PRED12; 3110074E07Rik; MT75; PRED12

Protein Construction:

A DNA sequence encoding the extracellular domain of mouse CHODL (EDK98299.1) (Met 1-Asn 216) was fused with the Fc region of human IgG1 at the C-terminus.

Source: Mouse

Expression Host: Human Cells

QC Testing

Purity: > 95 % as determined by SDS-PAGE

Endotoxin:

< 1.0 EU per µg of the protein as determined by the LAL method

Stability:

Samples are stable for up to twelve months from date of receipt at -70 °C

Predicted N terminal: Arg 22

Molecular Mass:

The secreted recombinant mouse CHODL/Fc is a disulfide-linked homodimer. The reduced monomer comprises 436 amino acids and has a calculated molecular mass of 48.9 kDa. As a result of glycosylation, the apparent molecular mass of rmCHODL/Fc monomer is approximately 60 kDa in SDS-PAGE under reducing conditions.

Formulation:

Lyophilized from sterile PBS, pH 7.4

Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization. Specific concentrations are included in the hardcopy of COA. Please contact us for any concerns or special requirements.

Usage Guide

Storage:

Store it under sterile conditions at -20°C to -80°C upon receiving. Recommend to aliquot the protein into smaller quantities for optimal storage.

Avoid repeated freeze-thaw cycles.

Reconstitution:

Detailed reconstitution instructions are sent along with the products.

SDS-PAGE:
